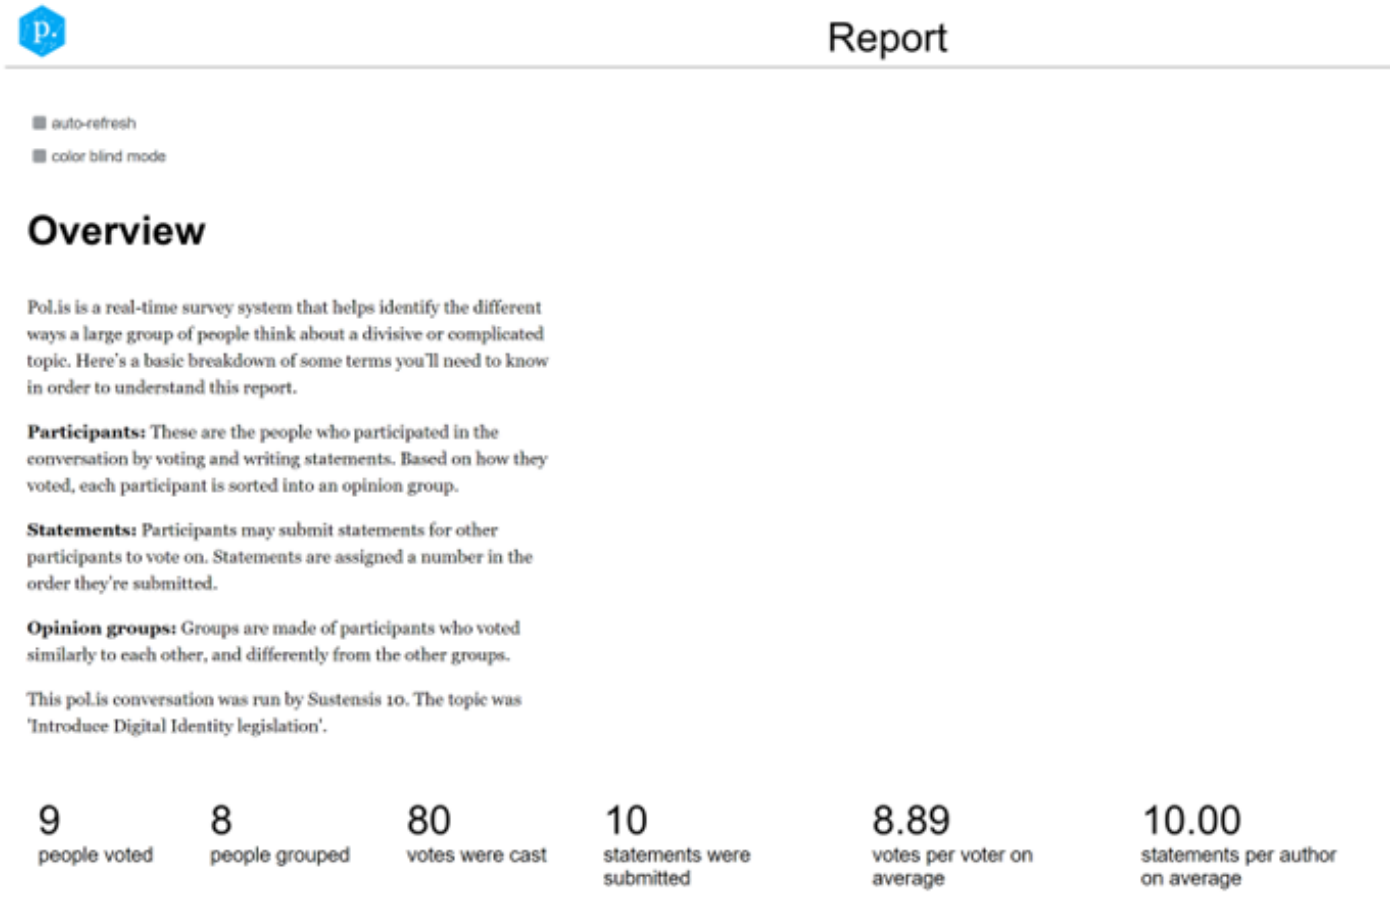
Consensus AI Report produced for 8 participants using POLIS - DRAFT

28/1/2023



How divisive was the conversation?

Statements (here as little circles) to the left were voted on the same way—either everyone agreed or everyone disagreed. Statements to the right were divisive—participants were split between agreement and disagreement.

How to use this: Hover to see the statement text. Start on the far right to find out what the most divisive statement was.

Consensus statements

Divisive statements

	STATEMENT	OVERALL	A 4	B 4
3	Digital identities can reduce fraud by making it harder for fraudsters to obtain and use stolen identities. This can increase security and protect individuals and organizations from financial loss.	50% 50% 0% (8)	100% 0% 0% (4)	0% 100% 0% (4)

Majority

Here's what most people agreed with.

60% or more of all participants voted one way or the other, regardless of whether large amounts of certain minority opinion groups voted the other way.

	STATEMENT	OVERALL 8	A 4	B 4
4	The document does not mention the potential for digital identities to be hacked or stolen,which is an important aspect to consider when implementing digital ID. It is important that measures are in place to protect against these risks and to respond appropriately if a breach occurs.	75% 25% 0% (8)	50% 50% 0% (4)	100% 0% 0% (4)
8	The document does not mention how the data will be stored and protected, which is an important aspect of digital ID to consider. It is important that data storage and protection measures are robust and in compliance with relevant regulations.	75% 0% 25% (8)	50% 0% 50% (4)	100% 0% 0% (4)

Opinion Groups

Across 8 total participants, opinion groups emerged. There are two factors that define an opinion group. First, each opinion group is made up of a number of participants who tended to vote similarly on multiple statements. Second, each group of participants who voted similarly will have also voted distinctly differently from other groups.

Group A: 4 participants

Statements which make this group unique, by their votes:

	STATEMENT	OVERALL 8	A 4	B 4
3	Digital identities can reduce fraud by making it harder for fraudsters to obtain and use stolen identities. This can increase security and protect individuals and organizations from financial loss.	50% 50% 0% (8)	100% 0% 0% (4)	0% 100% 0% (4)
0	The document does not mention the potential for misuse of the digital identities by organizations.	62% 12% 25% (8)	100% 0% 0% (4)	25% 25% 50% (4)
5	Digital identities can increase privacy by limiting the personal information shared when verifying identity. This can reduce the risk of identity theft and protect individuals' sensitive information.	50% 12% 37% (8)	75% 0% 25% (4)	25% 25% 50% (4)

Group B: 4 participants

Statements which make this group unique, by their votes:

	STATEMENT	OVERALL 8	A 4	B 4
8	The document does not mention how the data will be stored and protected, which is an important aspect of digital ID to consider. It is important that data storage and protection measures are robust and in compliance with relevant regulations.	75% 0% 25% (8)	50% 0% 50% (4)	100% 0% 0% (4)
4	The document does not mention the potential for digital identities to be hacked or stolen,which is an important aspect to consider when implementing digital ID. It is important that measures are in place to protect against these risks and to respond appropriately if a breach occurs.	75% 25% 0% (8)	50% 50% 0% (4)	100% 0% 0% (4)
3	Digital identities can reduce fraud by making it harder for fraudsters to obtain and use stolen identities. This can increase security and protect individuals and organizations from financial loss.	50% 50% 0% (8)	100% 0% 0% (4)	0% 100% 0% (4)

Areas of uncertainty

Across all 8 participants, there was uncertainty about the following statements. Greater than 30% of participants who saw these statements 'passed'.

Areas of uncertainty can provide avenues to educate and open dialogue with your community.

	STATEMENT	OVERALL 8	A 4	B 4
1	The legislation will establish a robust and secure accreditation and certification process and trustmark so organizations can clearly prove they are meeting the highest security and privacy standards needed to use digital identities.	25% 25% 50% (8)	50% 25% 25% (4)	0% 25% 75% (4)
5	Digital identities can increase privacy by limiting the personal information shared when verifying identity. This can reduce the risk of identity theft and protect individuals' sensitive information.	50% 12% 37% (8)	75% 0% 25% (4)	25% 25% 50% (4)

Graph

Which statements were voted on similarly? How do participants relate to each other?

In this graph, statements are positioned more closely to statements which were voted on similarly. Participants, in turn, are positioned more closely to statements on which they agreed, and further from statements on which they disagreed. This means participants who voted similarly are closer together.

Axes | Radial axes | Statements | Participants (bucketized) | Group outline | Group labels
